RADIO TRACKING YOUR SAR TEAMS

By **Herb Gerhardt** KB7UVC *hgerhardt@wavecable.com* 360-275-6876

APRS Presentation given at the **Washington 2007 SAR Conference** in Pierce County.

Today's Power Point Presentation and two hand-outs are posted at:

http://wetnet.net/~we7u

Then go down to "Miscellaneous Links" and select the item of your choice:

WASAR 2007 Presentation: "Radio Tracking Your SAR Teams"
WASAR 2007 Handout: "Radio Tracking Your SAR Teams"
Brochure: "GETTING STARTED WITH APRS, Rev 4/1/07"

Info on APRS: *http://www.nwaprs.info*

APRS Client Capabilities Chart: *http://www.eskimo.com/~archer/aprs_capabilities.html*

DMAPPER is a patch program that plots APRS positions on MapTech and TOPO! mapping software: *http://www.roadfacts.com/software/dmapper/dmapperInfo.htm*

XASTIR is an open-source APRS program that runs on a variety of computers. It is free for the download, supports 125 map formats and many SAR-specific features. Three of the (currently) 15 developers are SAR members. Recommended for Linux users.

For info on Xastir contact: **Curt Mills** WE7U *archer@eskimo.com*
Curt's web page: *http://www.eskimo.com/~archer*

Info on Internet **FindU**: *http://www.findu.com/*

To find all of Herb's APRS stations via the Internet: *http://map.findu.com/kb7uvc**

Once there, click on any particular station to see its location on a map.
To find the location of any other APRS station, substitute that station's call sign for my call (kb7uvc). Be sure to have the * which is a wild card at the end of the call.
